How to Combine Features?

Field Management provides administrators with the ability to enhance their data capture from members.

It provides the ability to ask any question in a range of different formats through a number of different methods.

Data capture fields and forms can be added to the member profile, membership purchase journey, and ticket purchase journey.

Some screenshots and info in this guide may differ depending on subscription type.

What are the different Overviews under Field Management?

Member Overview allows you to create forms and fields within the member profile. These can also be used for membership purchase journeys.

Event Booking Overview allows you to create forms containing fields that can be attached to an event ticket and completed during the ticket purchase journey.

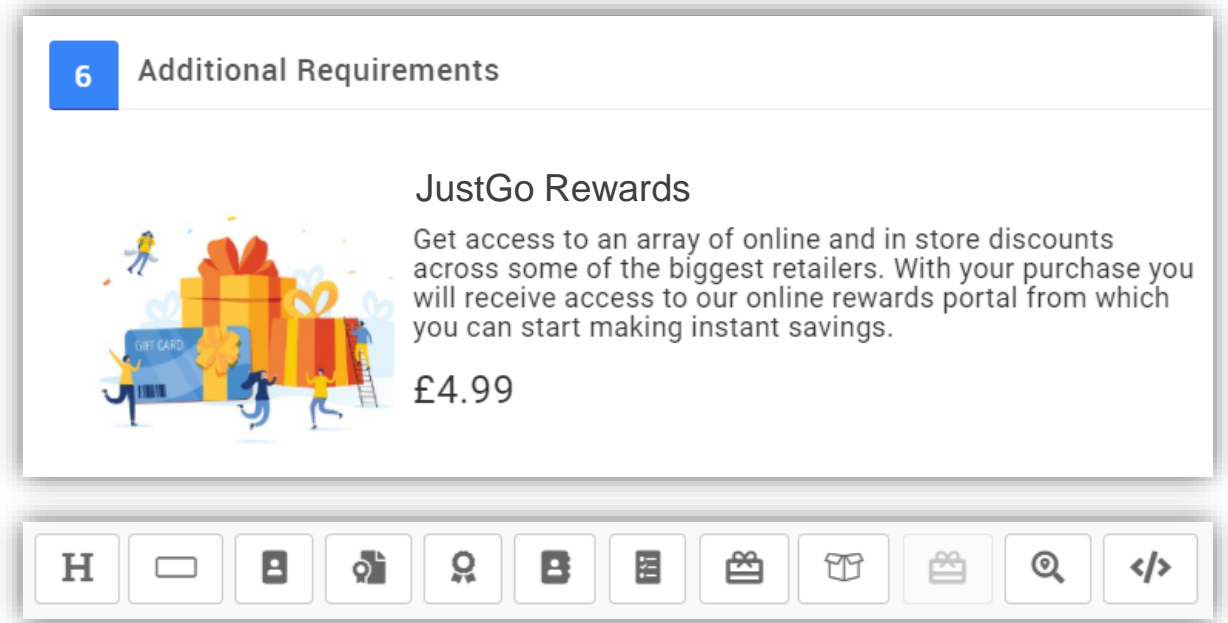

How do I link my fields to Membership?

Additional Requirements allow you to take your membership one step further with advanced personalisation.

Create Headers and sections for additional info.

Collect a profile picture, qualifications or additional data during purchase.

You can even include upsell products such as the rewards scheme seen in the image.

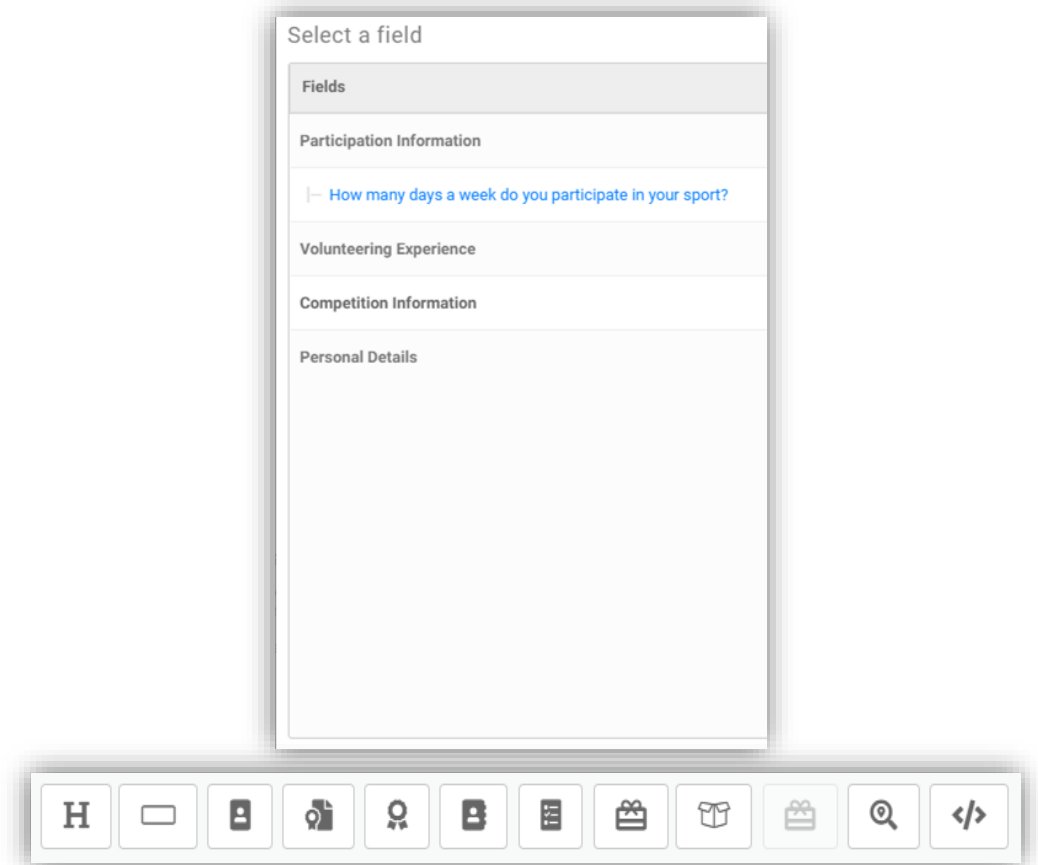

Continued on the next page...

How do I link my fields to Membership?

Fields can be added to specific membership types through the Membership Setup feature.

You can apply individual fields to individual membership types so you do not have to have all the same fields under every membership.

Note: Fields must be created in the Member Overview to be used in the membership purchase journey.

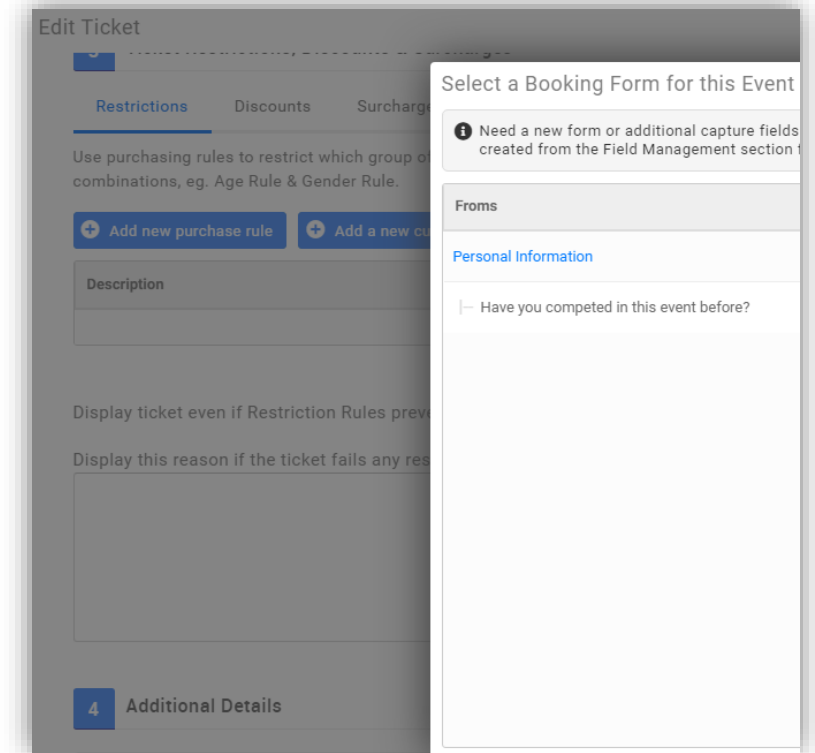

How do I link my fields to events?

Fields can be added to specific event tickets through the Event Management feature. You can read more about this in the Event Management User Guide.

You can apply only full forms to tickets rather than individual fields so if you only have one question to ask, it should make up the entire form.

Note: Fields must be created in the Event Booking Overview to be used in the event ticket purchase journey.

The screenshot displays the 'Edit Ticket' interface with the 'Restrictions' tab selected. The main content area shows a 'Description' field and buttons for 'Add new purchase rule' and 'Add a new cu'. A modal titled 'Select a Booking Form for this Event' is open on the right, featuring a message: 'Need a new form or additional capture fields created from the Field Management section 1'. Below this, the 'Froms' section lists 'Personal Information' and a checkbox for 'Have you competed in this event before?'. The bottom of the interface shows a progress bar with '4 Additional Details' highlighted.
